Up to

4x faster

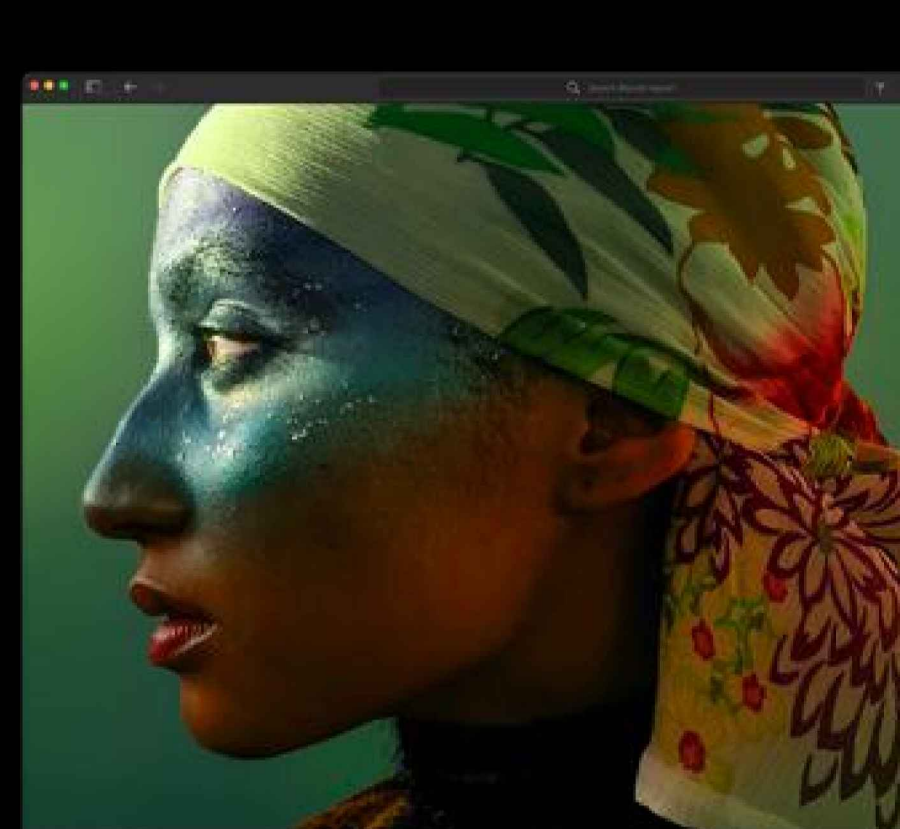

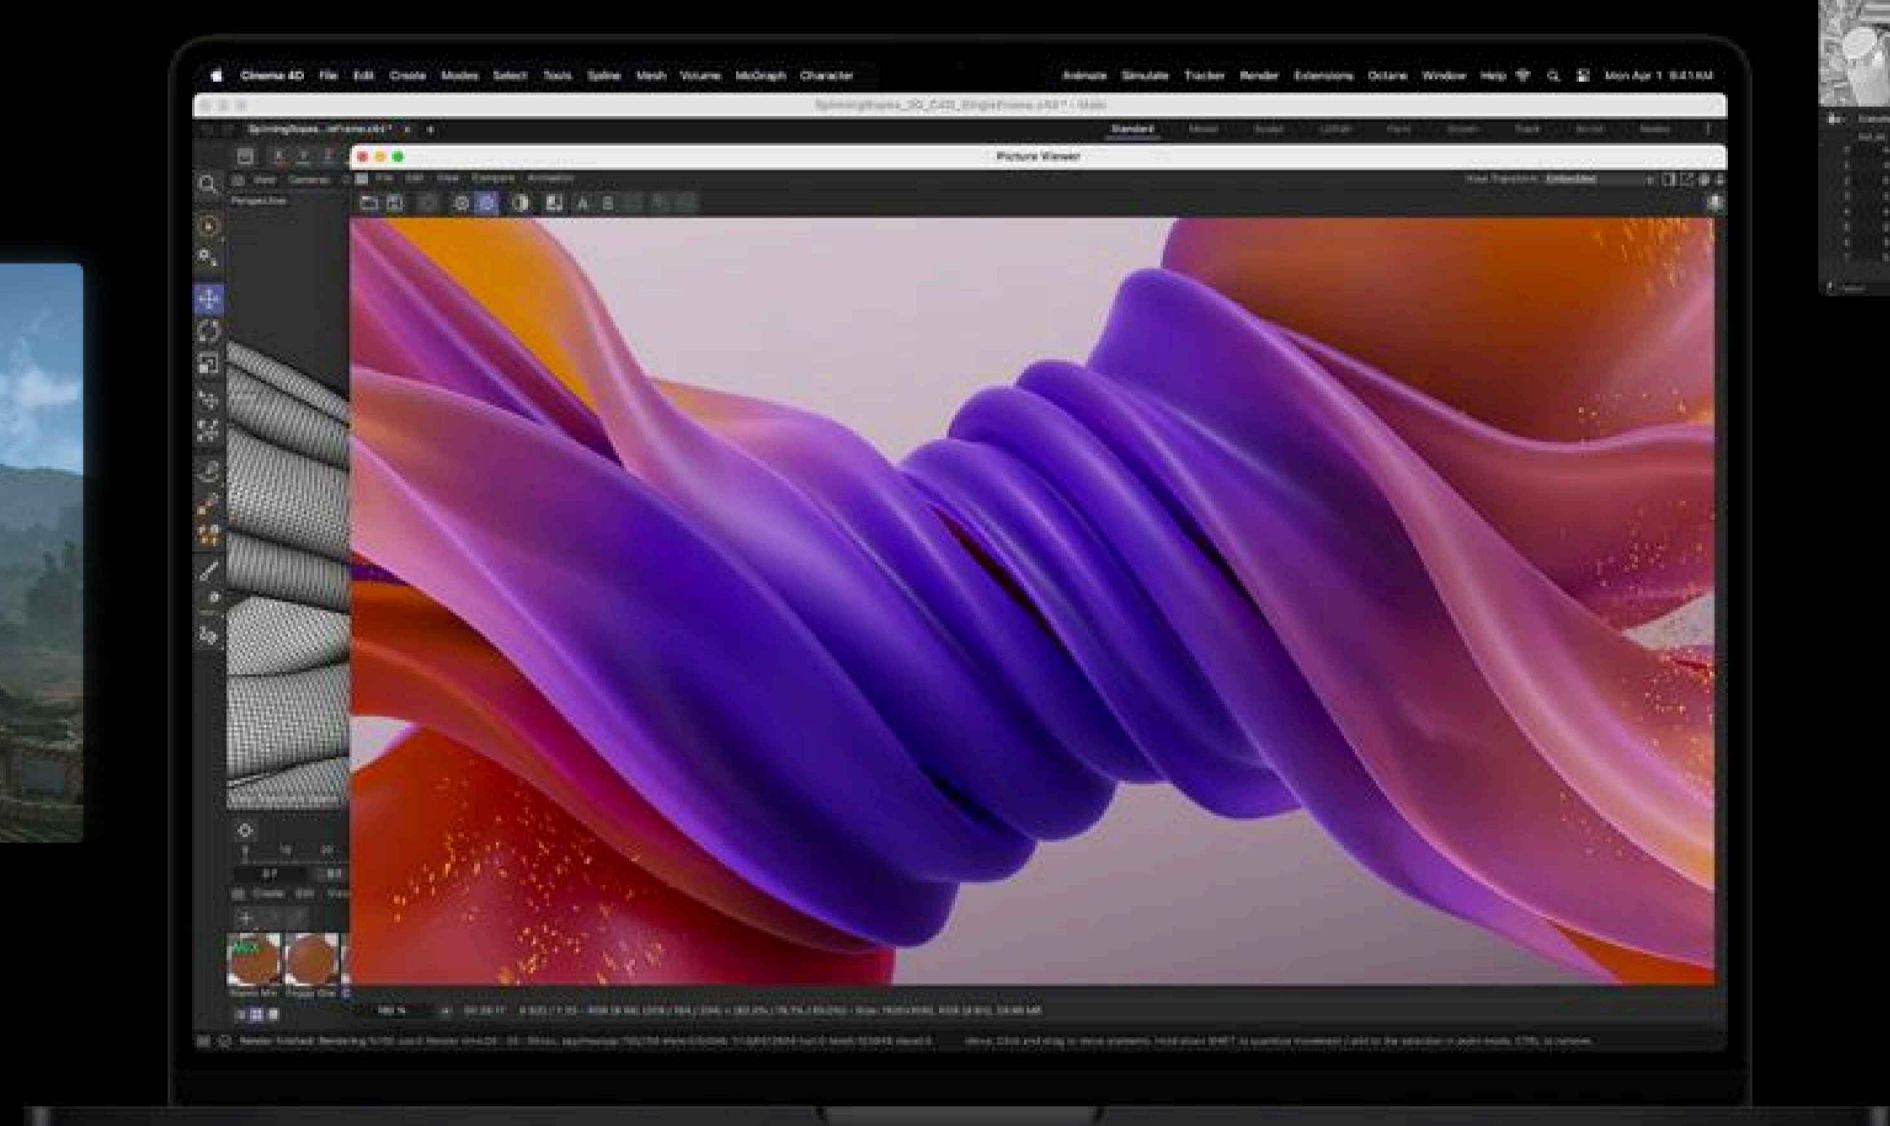

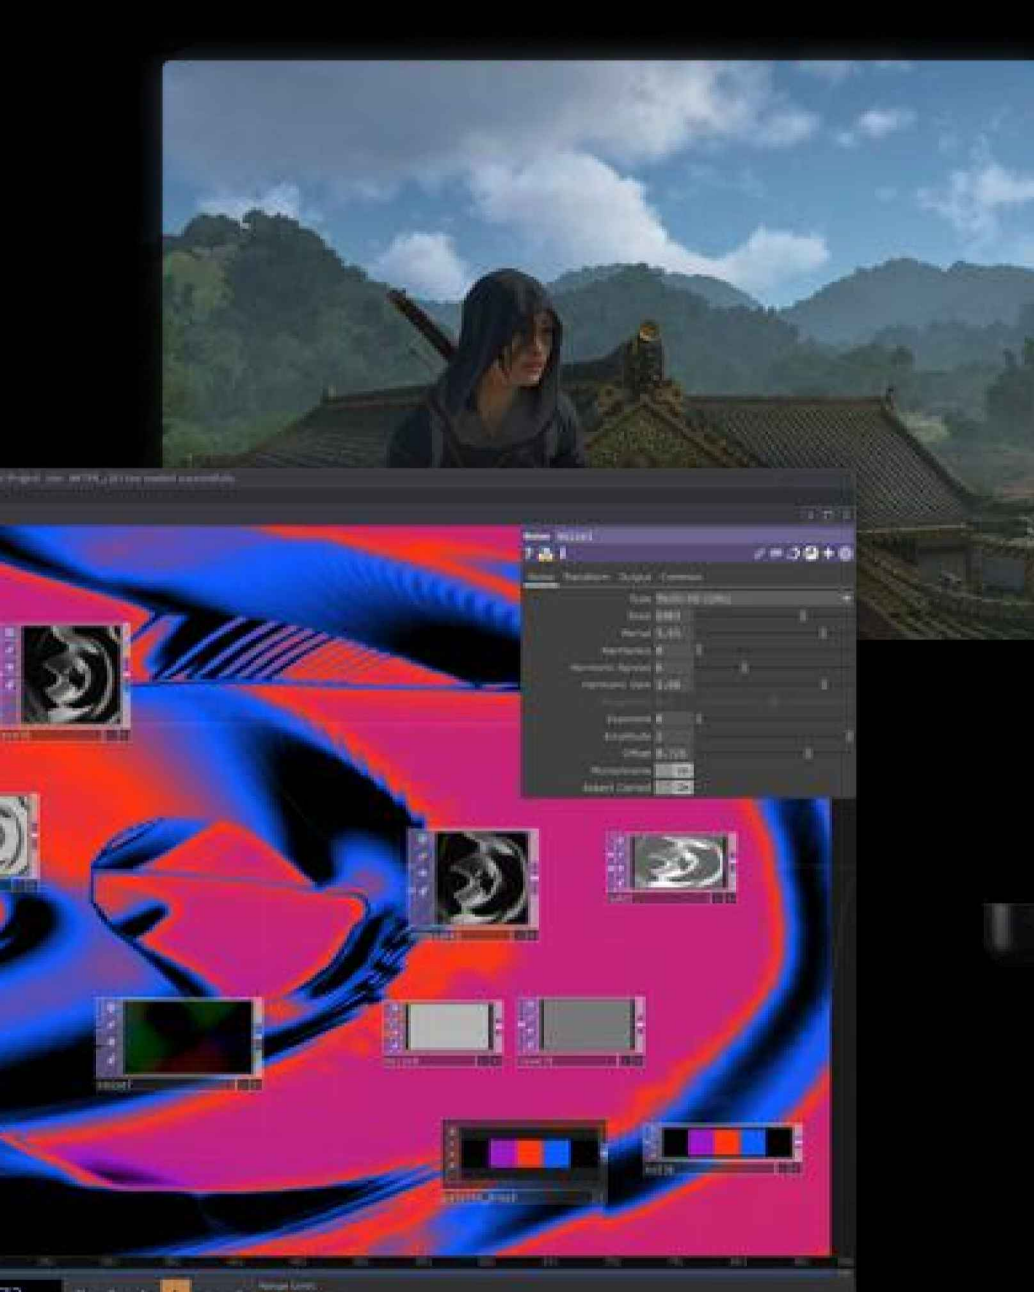

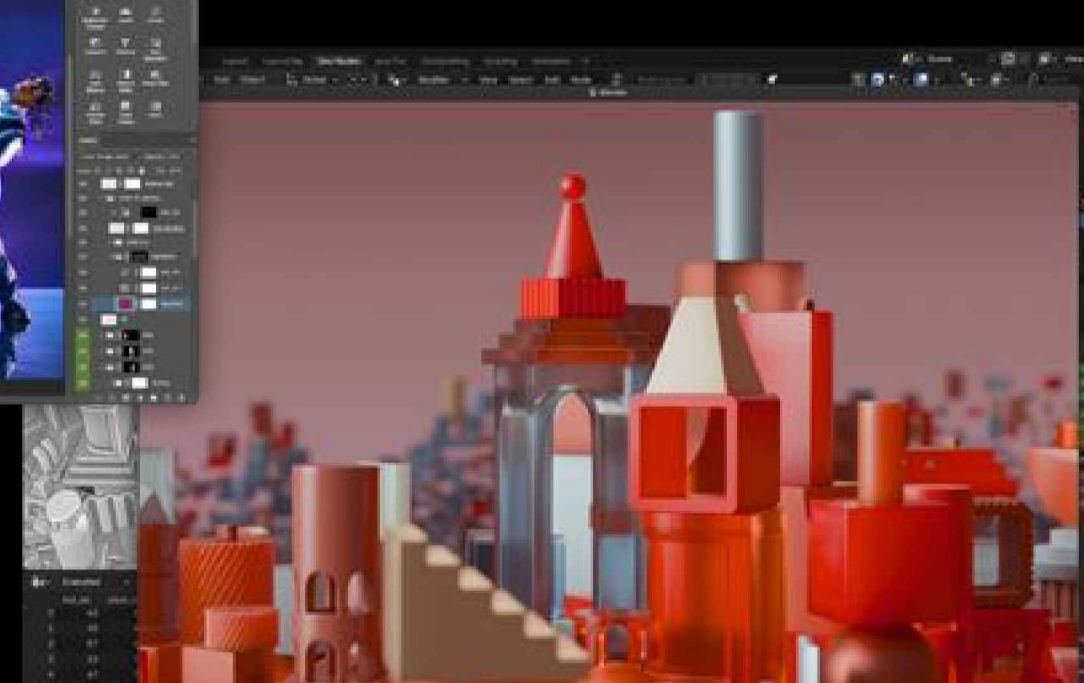

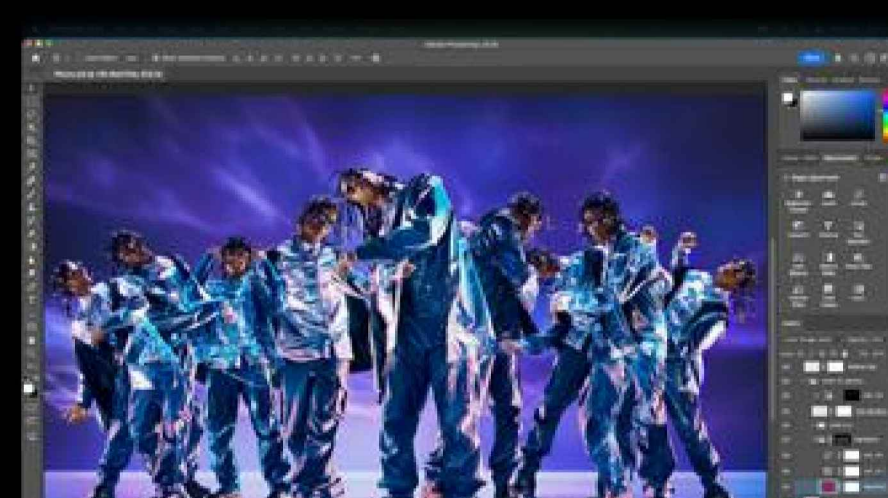

pro rendering performance than M2

Up to

1.5x faster

CPU performance than M2

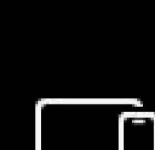

Next-level graphics performance. Game on.

Run graphics-intensive workflows with a responsiveness that keeps up with your imagination. The M4 family of chips features a GPU with a second-generation hardware-accelerated ray tracing engine that renders images faster, so **gaming feels more immersive and realistic than ever**.

And Dynamic Caching optimizes fast on-chip memory to dramatically increase average GPU utilization — driving a huge performance boost for the most demanding pro apps and games.

See it all in a new light.

iPhone Mirroring. See and use what's on your iPhone from your Mac, without having to reach for it.

Universal Clipboard. Copy text, images, photos, and videos on your iPhone & paste to your Mac.

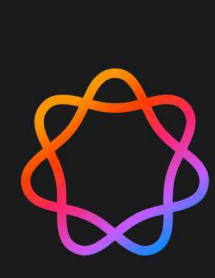

AirDrop. Wirelessly share photos, large files, and more between your iPhone, your Mac, & other devices.

There's never been a better time to upgrade.

Here's what you get with the new MacBook Pro.

Fly through demanding tasks up to **9.8x faster**.

Built for **Apple Intelligence**.

A stunning **Liquid Retina XDR** display.

Up to **14 more hours** battery life. (Up to 24 hours total.)
